

K1

TRAUMA

Watch the video about a trauma and answer the questions.

- Where does the episode take place?
- Who is injured?
- How did the accident happen?
- What are the injuries?

Listen again and make notes about the phrases the physician uses to explain what happened to the patient and about phrases used to explain the medical procedures.

K1

MYOCARDIAL INFARCTION

Explaining the procedures.

When treating patients in emergency situations, it is necessary to explain to them or to people around what you are going to do.

Look at the snippets from the video about myocardial infarction and put them to the order in which they are used in the video (e.g. by marking them with numbers).

- check blood pressure
- oxygen level
- put this round arm and inflate it.
- breathing
- oxygen mask
- exercise
- deep breath - hold it
- it's all set
- stretcher
- put a band around arm
- insurance card+ ID card
- pin prick
- lift up shirt
- heart rate
- feel pressure
- finger sensor
- record -electrocardiogram
- tongue against the roof
- disinfect
- take to hospital
- electrodes -chest
- spray some medicine
- insert a small tube
- coronary care unit

Check with the video-script, repeat and practise the phrases you hear

K1

CHILD CARDIOPULMONARY RESUSCITATION

Watch the video about child cardiopulmonary resuscitation and answer the questions.

1. What are the child's symptoms?

2. Has the baby had any health problems before?

3. Did the mother feed her before sleeping?

4. Did the EMS team manage to save the baby's life?

5. Does the baby have to be taken to hospital?

6. Why can't the parents go to the hospital in the ambulance?

7. Where are the EMS team taking the baby?
